

# Clarity AI Sustainability Raw Data - Energy Transition

Measure how your portfolios evolve  
towards renewable energies and  
energy consumption

# Energy Transition and Clean Energy

## Problem

Meeting the world's energy demands has become increasingly challenging due to the finite availability of natural resources, geopolitical tensions, and environmental concerns. As a result, there is a growing need for a transition towards cleaner and more sustainable sources of energy, supported by policy makers.

## Solution

This template contains a combination of different type of metrics and targets such as the percentage of renewable energy used or the share of revenues from fossil fuel exploitation. These indicators will allow you to assess the efforts organizations in your portfolio are making towards a cleaner energy transition while understanding their exposure to physical and transitional risks. This approach helps address the challenges related to resource availability and environmental concerns, ultimately leading to a more secure and sustainable future.

### Standard delivery format

We help our clients choose from our vast inventory of data to solve specific problems. Clients can use the template as it is, or enrich it with data from our inventory to have a custom product. Our standard delivery method is a **monthly datafeed, in a long format CSV file** to our S3 aws hosted services.

## About Clarity AI

Clarity AI is a sustainability technology platform that uses machine learning and big data to deliver environmental and social insights to investors, organizations, and consumers. Clarity AI's capabilities are an essential tool for end-to-end sustainability analysis related to investing, corporate research, benchmarking, consumer ecommerce, and regulatory reporting. As of June 2023, Clarity AI's platform analyzes more than 70,000 companies, 420,000 funds, 201 countries, and 199 local governments, which represents more breadth than any other player in the market. One way Clarity AI delivers on its mission to bring societal impact to markets is by ensuring its capabilities are delivered directly into clients' workflows through integrations with partners like BlackRock - Aladdin, Refinitiv an LSEG business, BNP Manaos, CACEIS, and Simcorp. Additionally, Clarity AI's sustainability insights reach more than 150 million consumers across more than 400,000 merchants on the Klarna platform. Clarity AI has offices in North America, Europe, and the Middle East, and its client network manages tens of trillions in assets and includes companies like Invesco, Nordea, BlackRock, Santander, Wellington, and BNP Paribas.
